THE FEE IS INTENDED VAT INCLUDED. IT COVERS ALL LECTURES, COURSE MATERIAL, WI-FI CONNECTIONS, LUNCHES AND COFFEE BREAKS. TRAVEL AND OTHER LIVING EXPENSES ARE NOT INCLUDED.

**APPLICATION DEADLINE**

FEBRUARY 1, 2023

IMPROVE THE MANAGEMENT OF SEVERE NEUROLOGICAL EMERGENCIES IN INTENSIVE CARE

PROGRAM DESCRIPTION

The goal of this clinically oriented week is to provide intellectual interaction with leading experts, to gather the essential information needed to treat neurological/neurosurgical patients, including traumatic brain injury, subarachnoid haemorrhage and intracranial haemorrhage. The school target audience includes staff doctors/residents working in ICUs, as well as neurosurgeons and neurologists.

“NeuroIntensive Care: Update 2023”, is the fifth in-person edition of a successful course held aimed at fostering a collaborative, multidisciplinary approach.

The school provides a consistent set of basic knowledge, updated treatment strategies, clinical scenarios, including hands-on simulations, to be used during patient management. In a week, the participants will be intensively exposed to lectures on topics ranging from basic concepts to monitoring systems and treatment strategies in traumatic and non-traumatic neuro emergencies. We'll provide students with live lectures made in person by outstanding experts. This year we will enhance direct interactions with speakers through the daily "Challenge the Expert" sessions.

Finally, we refined the hands-on sessions, which will take place daily for two hours, at the end of the day.

... SPEAKERS

Andrea Rossetti, CHUV Lausanne, Switzerland
Carlo Giussani, University of Milan-Bicocca, Italy
Carolina Iaquaniello, Istituto Neurologico "Carlo Besta", Milano, Italy
Cecilia Åkerlund, Karolinska Institutet, Stockholm, Sweden
